Honorable Judge,

I am a concerned employee in the high tech industry. Every court has found that Microsoft has used its operating system monopoly to dominate other software markets as well, thus violating anti-trust laws. The many billions of dollars Microsoft earned illegally from its anti-trust violations are being given to the company without penalty.

The proposed final judgment also does nothing to prevent Microsoft from continuing in this behavior and would amount to a government mandate of the monopoly. With such serious flaws in the proposed U.S. vs. Microsoft settlement, I urge you to reject it.

Respectfully,

Amy Chaves
